

Telnic releases Quick Setup Tool for .tel names

LONDON, United Kingdom - 7th April, 2011 - Telnic Limited (<http://telnic.tel>), the registry operator for the .tel top level domain (TLD), today announced that it is now even simpler to set up your .tel with the release of its new Quick Setup Tool.

In three simple steps, customers can now quickly input, preview and then publish their business contact information, social media links and location information, creating a clean and simple online presence that is automatically both accessible for search engines and mobile friendly.

“We’re continuously looking at ways to make .tel names more accessible, especially for those who don’t find technology that easy to grasp,” said Nadya Morozova, Community Relations Director at Telnic. “With this new Quick Setup Tool, if you can fill in a form, you can publish all of your contact information online, in one simple-to-access place that you own, with the benefit of being found wherever you are.”

More and more small businesses and individual professionals in over 180 countries worldwide are benefitting from the enhanced visibility that a .tel name can provide. For more information on how to use .tel names and to find out how people are using them every day, please visit <http://ILoveMyTel.com>.
